RULES:

- 1 Label & number the x-axis and the y-axis.
- 2 Draw your ships vertically or horizontally on your grid. (ships may not touch or cross each other)
- 3 Take turns calling ordered pairs to locate your opponent's ships. ex: (-5,4)
- 4 When every whole coordinate that a ship sits on is located (by hits) the ship is sunk.

- 5 Keep track of your own hits and misses. The first player to sink all of the opponent's fleet wins.
